one week - one crew - one windmill

**How to build
a small scale
wind turbine**

**One week
Do-It-Yourself
Course**

Don't buy it, build it!

**September 6th - 10th 2014
Sonnenpark, St. Pölten, Austria**

**with
Jonathan
Schreiber**

Learn how you can build yourself a small wind turbine, and how to use it as your own local and sustainable energy supply

In the course we build a 2m diameter wind turbine together as a group. The wind turbine is based on Hugh Piggott's 2F design and we use common materials and scratch. All parts of it (generator, rotor, steel frame) will be built by ourselves and after the course you should be able to build your own at home. You will also learn how to set up a stand alone system using renewable energy sources, to provide power for a house for example. The course will be led in English if there are international participants.

Price: 380 €

Accommodation available in town. On site on request.
